

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The first case originated in a Mexican who went from Uvalde County to Ciudad Porfirio Diaz, Mexico, and there came in contact with cases of smallpox. On his return he developed a severe case of the confluent type of the disease. His wife, who had never been vaccinated, contracted smallpox from her husband, had the confluent type, and died on the seventh or eighth day. Her sister, who had had varioloid about 15 years before, sickened next and had a severe case, with less eruption, however, than her sister had had. The fourth case developed in a man who stated that he had had smallpox when a boy 14 or 15 years of age, since which time he had nursed many different smallpox cases and had apparently been immune. He developed the confluent type and was very ill. All other contacts were successfully vaccinated and no further cases developed.

MORBIDITY AND MORTALITY.

**MORBIDITY AND MORTALITY TABLE, CITIES OF THE UNITED STATES,
FOR WEEK ENDED MAY 4, 1912.**

Cities.	Population, United States Census 1910.	Total deaths from all causes.	Diph- theria.		Measles.		Scarlet fever.		Small- pox.		Tuber- culosis.		Typhoid fever.
